STREET RESURFACING ON OBSERVATORY AVENUE

WHAT/WHEN: As part of the City of Cincinnati's commitment to improving its neighborhood streets, street resurfacing work will begin in Hyde Park during the **week of May 23, 2005**. Crews of the **John R. Jurgensen Company** will remove the top ¾" of the existing asphalt pavement and then place a ¾" thick rubberized open-graded asphalt friction surface course. This type of asphalt provide better tire traction than standard asphalt pavement. Crews should complete the work in less than one week, and police will enforce any parking restrictions.

WHERE:	<u>Street</u>	<u>From</u>	<u>To</u>
	Observatory Avenue	St. John Place	Delta Avenue

The Department of Transportation and Engineering oversees the rehabilitation and improvement of streets in the City of Cincinnati. The Department is also responsible for transportation planning, design, engineering services, structural and geotechnical services, right of way regulation and construction management. It is the clearinghouse for all City and regional transportation functions, and also serves as a liaison to the Southwest Ohio Regional Transit Authority. For more information about our department, visit <http://www.cincinnati-oh.gov/dote>
